

Kinetic energy is the energy an object has due to its

Answer:

Movement

Explanation:

Kinetic energy is the type of energy that object obtains when being in motion. therefore Kinetic energy is the energy an object has due to its movement!

Answer:

Motion, I believe.

Explanation:

Assume that a family spends 35% of its income on housing, 20% on travel-related expenses, 10% on utilities, 25% on health care, and 5% on miscellaneous items. Demand for which category will be most responsive to a change in price?

What is the extraneous solution to the equation $\frac{b}{b-7} - \frac{2}{b} = \frac{7}{b-7}$?

What was the response among Americans when the Soviet Union launched satellites into space in 1957?

In 8.4 s a fisherman winds 2.9 m of fishing line onto a reel whose radius is 3.0 cm (assumed to be constant as an approximation). The line is being reeled in at a constant speed. Determine the angular speed of the reel.

Eight and $\frac{1}{6}$ divided by 2 and $\frac{1}{24}$

Why are invasive species dangerous to the environment?

Iridium-192 has a half life of 74 days after 148 days, how many milligrams of 900 mg sample will remain?

G Chairish-Is-The Word, Inc., manufactures top-end hardwood chairs that are sold through a variety of retail outlets. The most popular model sells (wholesale) for \$400 per chair and costs \$300 to make. Past data show that average monthly demand is 1,000 chairs with a standard deviation of 200 chairs and that the normal distribution is a reasonable fit. CITW uses a 20 percent annual interest charge to estimate inventory carrying costs, so that the cost to carry one chair in stock for 1 month is $\$300(0.20)/12 = \5 . If all orders are backlogged and the cost of lost customer goodwill from carrying a single chair on backorder is \$20, what order-up-to (base stock) level should CITW use?

How is the circulatory system similar to a road-and-highway system?

Which part of the government has the greatest authority in setting foreign policy?

Question 7 (1 point) Select the correct answer. Winston Churchill made the speech in the passage to the House of Commons (the elected wing of the British

parliament) shortly after he took office in 1940, during World War II. What is the purpose of Churchill's speech? Blood, Toil, Tears, and Sweat by Winston Churchill (excerpt) On Friday evening last I received His Majesty's commission to form a new Administration. It was the evident wish and will of Parliament and the nation that this should be conceived on the broadest possible basis and that it should include all parties, both those who supported the late Government and also the parties of the Opposition. I have completed the most important part of this task. A War Cabinet has been formed of five Members, representing, with the Liberal Opposition, the unity of the nation. The three party Leaders have agreed to serve, either in the War Cabinet or in high executive office. The three Fighting Services have been filled. It was necessary that this should be done in one single day, on account of the extreme urgency and rigour of events. A number of other key positions were filled yesterday, and I am submitting a further list to His Majesty tonight. I hope to complete the appointment of the principal Ministers during tomorrow. The appointment of the other Ministers usually takes a little longer, but I trust that when Parliament meets again, this part of my task will be completed and that the Administration will be complete in all respects. . . . I considered it in the public interest to suggest that the House should be summoned to meet today. . . . to form an Administration of this scale and complexity is a serious undertaking in itself, but it must be remembered that we are in the preliminary stage of one of the greatest battles in history, that we are in action at many points in Norway and in Holland, that we have to be prepared in the Mediterranean, that the air battle is continuous and that many preparations have to be made here at home. In this crisis I hope I may be pardoned if I do not address the House at any length today. I hope that any of my friends and colleagues, or former colleagues, who are affected by the political reconstruction, will make all allowances for any lack of ceremony with which it has been necessary to act. I would say to the House, as I said to those who have joined the government: "I have nothing to offer but blood, toil, tears and sweat." We have before us an ordeal of the most grievous kind. We have before us many, many long months of struggle and of suffering. You ask, what is our policy? I will say: It is to wage war, by sea, land, and air, with all our might and with all the strength that God can give us; to wage war against a monstrous tyranny, never surpassed in the dark and lamentable catalogue of human crime. That is our policy. You ask, what is our aim? I can answer in one word: victory. Victory at all costs, victory in spite of all terror, victory, however long and hard the road may be; for without victory, there is no survival. Let that be realised; no survival for the British Empire, no survival for all that the British Empire has stood for, no survival for the urge and impulse of the ages, that mankind will move forward towards its goal. But I take up my task with buoyancy and hope. I feel sure that our cause will not be suffered to fail among men. At this time I feel entitled to claim the aid of all, and I say, "Come then, let us go forward together with our united strength." a to threaten Britain's enemies in the war with dire consequences b to criticize the previous government for its anti-war stance c to express Churchill's government's resolve to wage the war d to assure the British public that Britain would soon win the war

Names of cell organelles?

Like an impaired driver, a fatigued driver, will be unable to focus and will blank

Bronchoconstriction is treated by inhaled A. Histamine antagonists

B. Opiates

C. Pentobarbitals

D. Cholinergic antagonists

The act of collaborating to write and send the Declaration of Independence reflected the principle of

URGENT!! WILL GIVE BRAINLIEST *IF IT IS CORRECT* Which list below describes the next steps of evaporated water through the water cycle?

A) Condensation, precipitation, runoff, ocean storage

B) Transpiration, condensation, precipitation, ocean storage

C) Precipitation, condensation, runoff, groundwater

It most likely is B or C idk tho

Lead nitrate can be decomposed by heating. what is the percent yield of the decomposition reaction if 9.9 g of $\text{Pb}(\text{NO}_3)_2$ are heated to give 5.5 g of PbO ?

Some individuals are unable to eat or drink dairy products containing lactose. What causes them to be unable to tolerate lactose in their diet? A) They are allergic to proteins from cattle. B) They lack an enzyme that breaks down lactose. C) There is an abnormality in the lining of their small intestine. Eliminate D) They are unable to absorb the products from the breakdown of lactose.
